

# ENDOSCOPE LIST & OPERATOR ID Advantage® Plus

FACILITY: \_\_\_\_\_ Reprocessor Type: \_\_\_\_\_

The endoscopes listed below are currently in use by the facility. Any endoscopes added by the facility must be verified for the correct hookup to use. Identifying the correct hookup is accomplished by referencing the interactive Medivators Hookup Guide for the specific brand and model of endoscope, which can be found on the Medivators website at: [www.minntech.com/medivators/HookupLookup](http://www.minntech.com/medivators/HookupLookup).

Only Medivators validated endoscope hookups can be used. Medivators hookups are validated for proper endoscope connection and fluid flow, which is critical to ensuring the endoscope and its interior channels are high level disinfected. Hookups CANNOT be modified or altered. Use of altered hookups is strictly prohibited and will NOT ensure endoscope decontamination or patient safety, and should never be used.

| ENDOSCOPE INFORMATION (Fill in non-shaded columns only) |       |         |          |          |           |               |         |
|---|-------|---------|----------|----------|-----------|---------------|---------|
| #   | BRAND | MODEL # | SERIAL # | SCOPE ID | HOOK-UP # | PARAMETER SET | BARCODE |
| 1   |       |         |          |          |           |               |         |
| 2   |       |         |          |          |           |               |         |
| 3   |       |         |          |          |           |               |         |
| 4   |       |         |          |          |           |               |         |
