

GUARANTEE OF RAPICIDE COMPATIBILITY WITH FLEXIBLE ENDOSCOPES

Minntech Rapicide® high level disinfectant (HLD) and sterilant, when used as directed in a Medivators® Advantage®, DSD-201, SSD-102, CER-1 or CER-2 endoscope reprocessor, is compatible with all flexible endoscopes.

Based upon Minntech's extensive battery of pre-market testing and validation protocols, we are quite confident that Rapicide, a glutaraldehyde based HLD will not only provide for the high level disinfection of flexible endoscopes, but also will not damage endoscopes (when used as directed). We offer the following guarantee:

If your endoscope is damaged as a result of the proper use of Rapicide HLD in a Medivators Advantage, DSD-201, SSD-102, CER-1 or CER-2 endoscope reprocessor, we will pay the full cost of repair for any damage verified to be caused by exposure to Rapicide.

After initial inspection of your current scope inventory, and the subsequent use of Rapicide HLD in an Advantage, DSD-201, SSD-102, CER-1 or CER-2 endoscope reprocessor as described above, should any of your pre-inspected flexible endoscopes be functionally or physically damaged (excluding normal cosmetic wear and tear) during the proper use of the disinfectant and reprocessor, Minntech will pay the full cost for the repair of the damaged endoscope, as described below.

Any claims for flexible endoscope damage relating to the use of Rapicide with a Medivators endoscope reprocessor must be reported to Minntech Corporation within two business days following detection of the damage. A complaint record will be opened for the incident at that time.

Assessment of the reprocessor and/or disinfectant-related damage to an endoscope will be conducted by a qualified independent firm or individual that provides inspection and repair of flexible endoscopes. Should such assessment determine that the use of Rapicide in a Medivators reprocessor (when properly used per manufacturer's instructions) has indeed caused functional or physical damage to the endoscope, Minntech Corporation will pay the cost of repairs to the endoscope that are specifically caused by and related to the use of the Medivators reprocessor and Rapicide.

Minntech Corporation reserves the right to modify or withdraw this guarantee with 90 days' prior notification.

Sincerely,

Terry S. Mistalski

Vice President of Marketing

Endoscope reprocessing the way it should be
